

NEXO

Product

STM series

The concept behind "Scale Through Modularity" from NEXO STM is enabling systems at various different sizes with only 4 types of modules and increasing the versatility level of one system to a new dimension. The STM series produces a sound quality and scalability which significantly exceeds current systems regardless of application size. STM provides high-quality and high-efficiency solutions not available in current systems from system storage to transportation, installation and operation.

System Diagram

NXAMP4 x 4 Channel Allocation

| NXAMP4x4 - 1 | | | |
|-------------------|------|------------|------------|
| CH A | CH B | CH C | CH D |
| Bridge / B112 x 3 | | M28 LF x 3 | M28 HF x 3 |
| NXAMP4x4 - 2 | | | |
| CH A | CH B | CH C | CH D |
| Bridge / S118 x 3 | | M28 LF x 3 | M28 HF x 3 |

| | Product Name | Manufacturer | Model No. | Standard Price |
|-----------|---------------------------|--------------|-------------------|----------------|
| Speaker | STM series | NEXO | STM M28, STM B112 | Negotiable |
| Subwoofer | STM series | NEXO | S118 | Negotiable |
| Amp | NXAMP series | NEXO | NXAMP4x4 | ¥1,420,000- |
| Processor | Built-in to the amplifier | | | |
