

Product

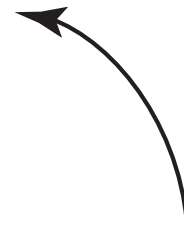

# K-array KH8

The KH8 speaker system which was developed with K-array's slim line array technology and supports stadium-level concerts will be released in Japan. These 3-way speakers have the latest DSP power amplifier built-in and are equipped with the directivity control "steering beam control" enabled by DPS control. The built-in double 21 inch powered subwoofer KS8 optimally designed for KH is used in the subwoofer.

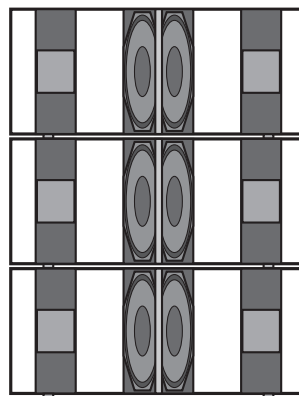

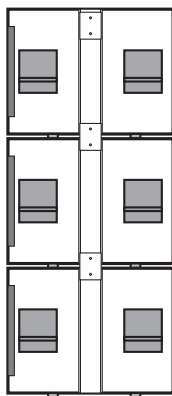

### System Diagram

Steering beam supported slim array speaker  
**KH8** × 6

The exclusive K-array cables enable input of digital, analog and network control all together. Everything is built-in including beam control DSP, system EQ and delay.

Double 21" built-in powered subwoofers  
**KS8** × 3
