

Product

Compact Array Speaker HX-7SR

This is the SR version of the HX-7 which was on display at last year's InterBEE. The HX-7 has an original TOA structure with a 4 module line array enabling flexible angle adjustment even when using as a single unit. The HX-7SR is divided into 2 more modules for an SR model which is lightweight, has increased portability and can be changed with the metal fittings which can easily be connected using the connection quick release pin. This system can be installed in a wide range of places from events to medium-sized arenas.
