

Product

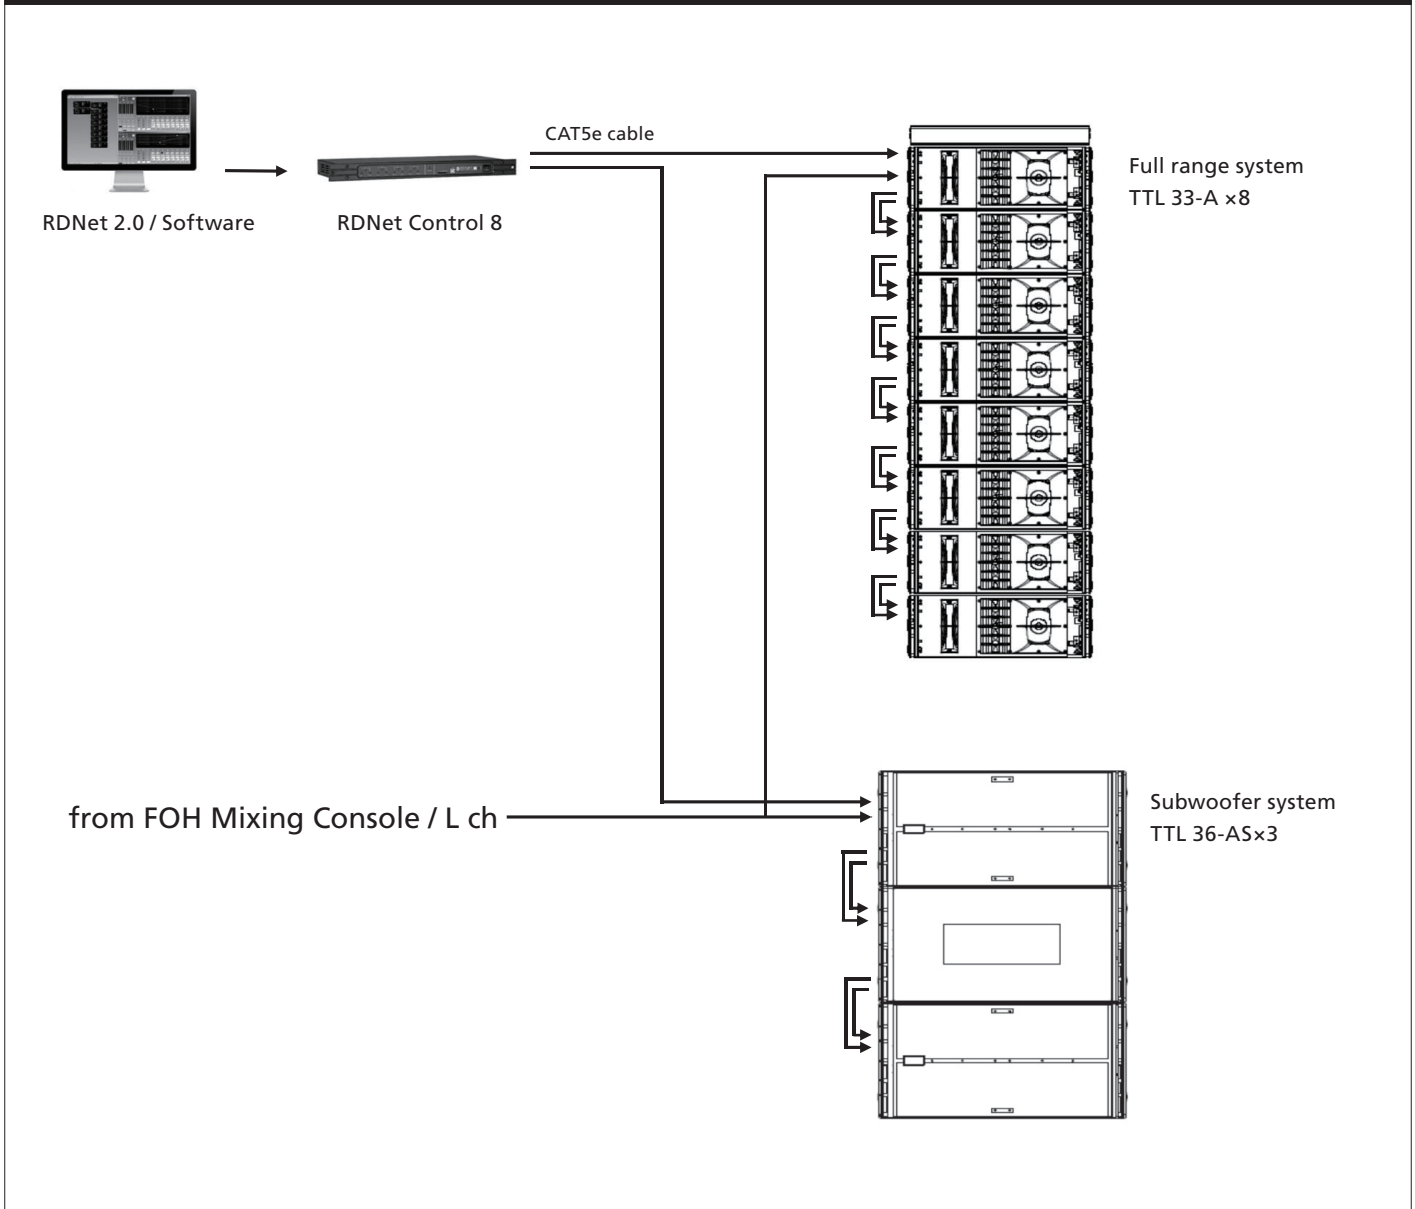

TT+ Series Active Line Array Speaker

RCF TT series equipped with self-developed driver unit and highly efficient digital amplifier with built-in DSP offer to build a simply system by controlling with RDNet software.

Only the connection of main output and LAN cable enables all system tuning with no processor or amplifier rack required.

The only 32.5Kgs of lightweight main unit allows for easy and wide range of installation from small/midium sized hall to arena class.
